

HANDGRENADES

HANDGRENADES are:
Andrew Pawelski // Nick Chevillet,
Joby Kaslowski // Jesse Shepherd-Bates

Bonding over a shared love of The Beatles, Andrew Pawelski and Nick Chevillet began performing together in 2008 as The HandGrenades. A variety of additional musicians came and went (including Andrew's brother, Tom Pawelski, who was key in developing the band's signature vocal style), until the band added drummer Joby Kaslowski, and released a debut EP in 2011.

A full-length was released in 2012, produced at Ghetto Recorders in Detroit by Jim Diamond, best-known for his work on the first two albums by The White Stripes, and a second EP followed in 2014.

Now, a more refined, four-piece version of Handgrenades has arrived, including Detroit-based guitar stalwart, Jesse Shepherd-Bates. This evolution of the band is not only noted in the sleeker presentation of its name, but also in the sound of *Tunnels*, the second full-length Handgrenades album, released in November 2016.

Produced by Zach Shipps (Electric Six), the songs on *Tunnels* could only have emerged from this veritable cauldron of the Detroit music scene, simmering for a decade, and now boiling over with one catchy tune after another.

In addition to the Beatles-esque melodies, three-part vocal harmonies, guitar rock edges, and Motown flavors that Handgrenades had already established as part of its music identity, *Tunnels* shows off modern influences such as The Flaming Lips, Radiohead, Jeff Buckley, and The National.

What you'll hear are four good guys who are, essentially, the mitten state's most energetic group of ruffians.
